**ISRAEL
MILITARY
INDUSTRIES LTD.**

Typical Operational Scenarios

Israel Military Industries Ltd. (IMI)

OPERATIONAL NEED

- **Improve individual soldier and squad performance in the modern battlefield**
 - Lethality
 - Sustainability
 - Mobility
 - Survivability

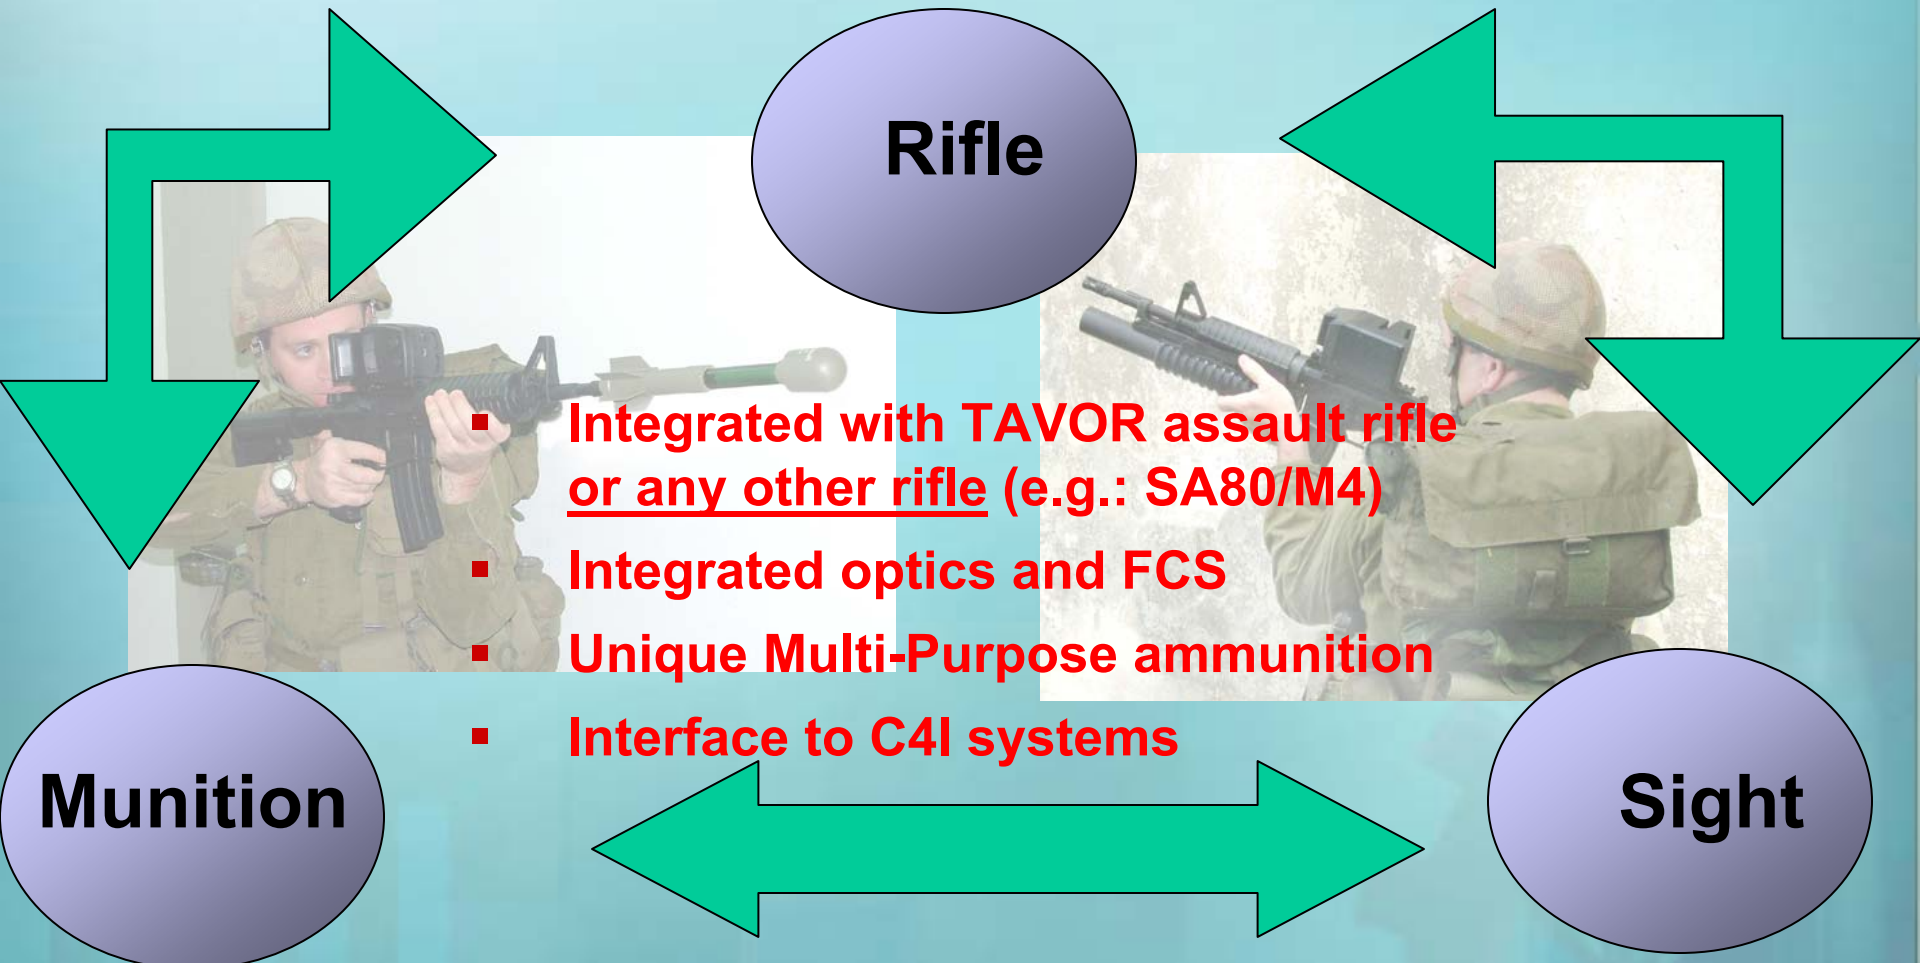

MPRS - Multi-Purpose Rifle System

Israel Military Industries Ltd. (IMI)

MPRS- Multi-Purpose Rifle System is a powerful force multiplier for the infantry soldier and the future warrior, especially for urban warfare

MPRS - Multi-Purpose Rifle System

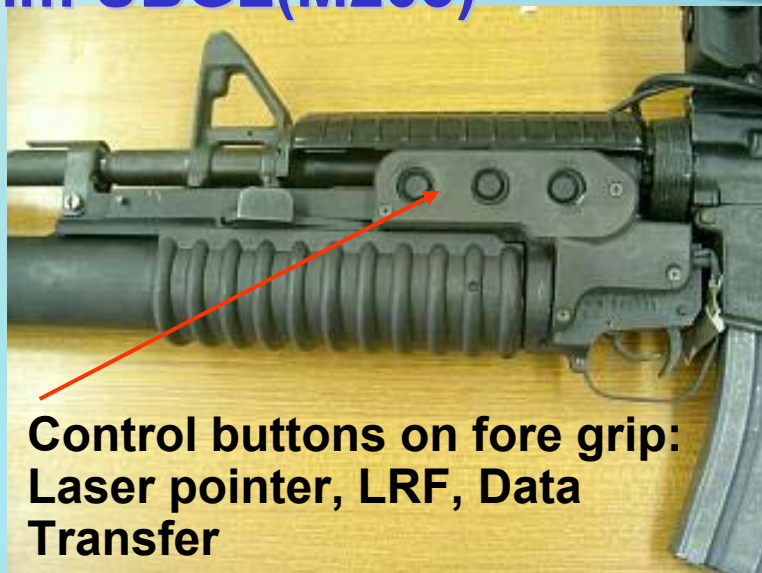

Israel Military Industries Ltd. (IMI)

SIGHT ASSEMBLY

- Aim point computation
- Mode selection and fuzing
- Data output interface

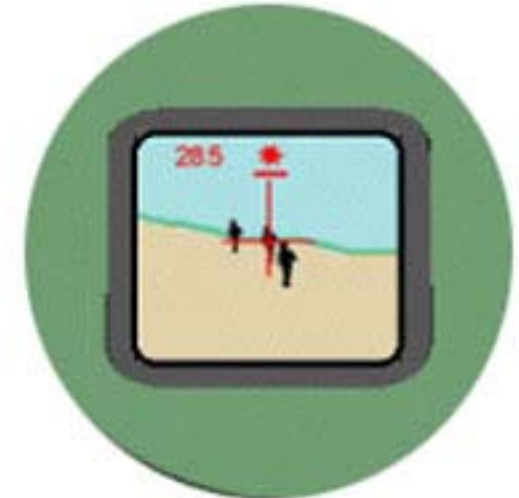

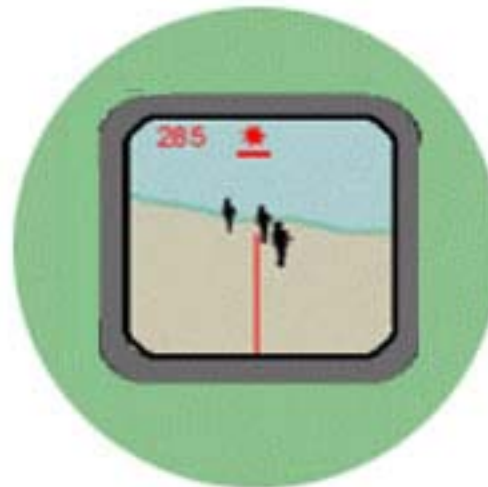

- Reflex Rifle Sight – red dot aiming, enables aiming with both eyes open
- Eye-safe laser pointer (IR or visible)
- Laser rangefinder – 1-m accuracy up to 600-m
- Fire Control System
- Rifle Grenade Sight – FCS coupled dynamic aiming point
- Compass
- Operated at night integrally with soldier's night vision device

COMMERCIAL IN CONFIDENCE - IMI PROPRIETARY

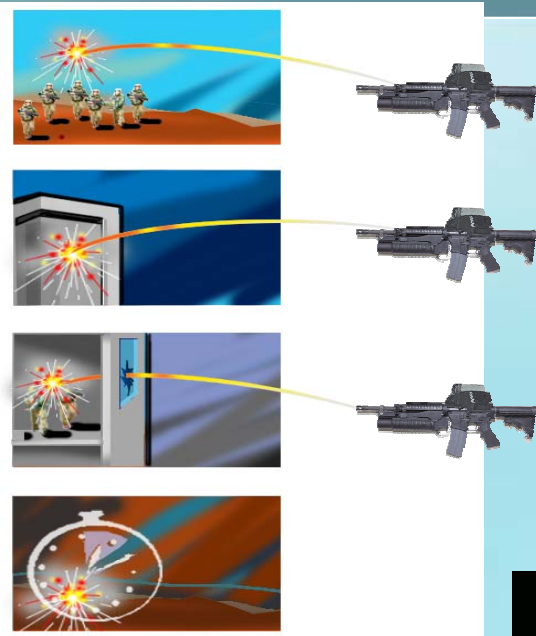

SYSTEM OPERATION

- Operation with 5.56 ammunition – unchanged
 - Mode selection
 - Ranging
 - Data Transfer
 - Aim
 - Fire

MPRS - Multi-Purpose Rifle System

Israel Military Industries Ltd. (IMI)

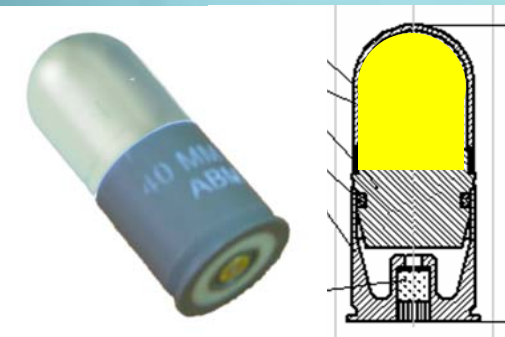

Ammunition:

- ♦ **LOS** and **BLOS** capability to 250-350 m' (up to 600m) .
- ♦ Unique Air-Burst munition (rifle grenade or 40mm grenade).
- ♦ High lethality fragmentation warhead optimized against infantry targets, based on electronic fuse .
- ♦ Operation modes:

Air-burst/point detonation/time delay/self destruct

MPRS - Rifle-Launched NL/LTL (RL-NL)

Israel Military Industries Ltd. (IMI)

STUN/CS

DESCRIPTION:

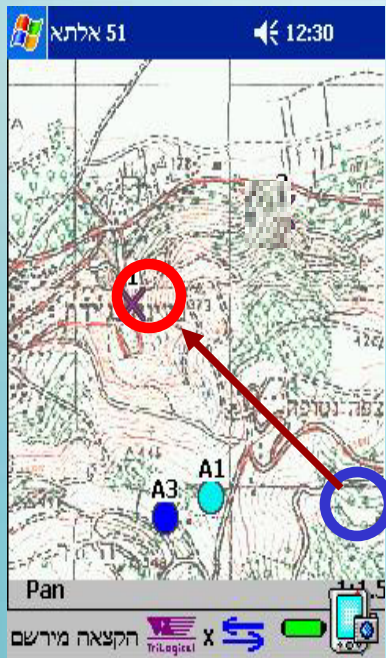

Non-Lethal / Less Than Lethal family of munitions launched from the Multi Purpose

Rifle System:

▪ **Airburst STUN/CS rifle grenade:**

- Based on the IMI rifle grenade and its capabilities.
- Warhead consists of STUN/CS materials replacing the explosive charge.
- Operates 2 meters above target.

DESCRIPTION:

C4I capabilities achieved by using the Multi Purpose Rifle System as an engagement device.

- Integrated system of systems approach provides network capabilities at the squad level.
- Data link from the sight to the body system/the command and control system. Feed and transfer data to mission computer (R.F./cable).

- Around the corner capability using digital camera to transfer images to the Head Mounted Display/ Hand Held Digital Display

Rifle-Launched Reconnaissance Grenade (RL-RG)

Israel Military Industries Ltd. (IMI)

DESCRIPTION:

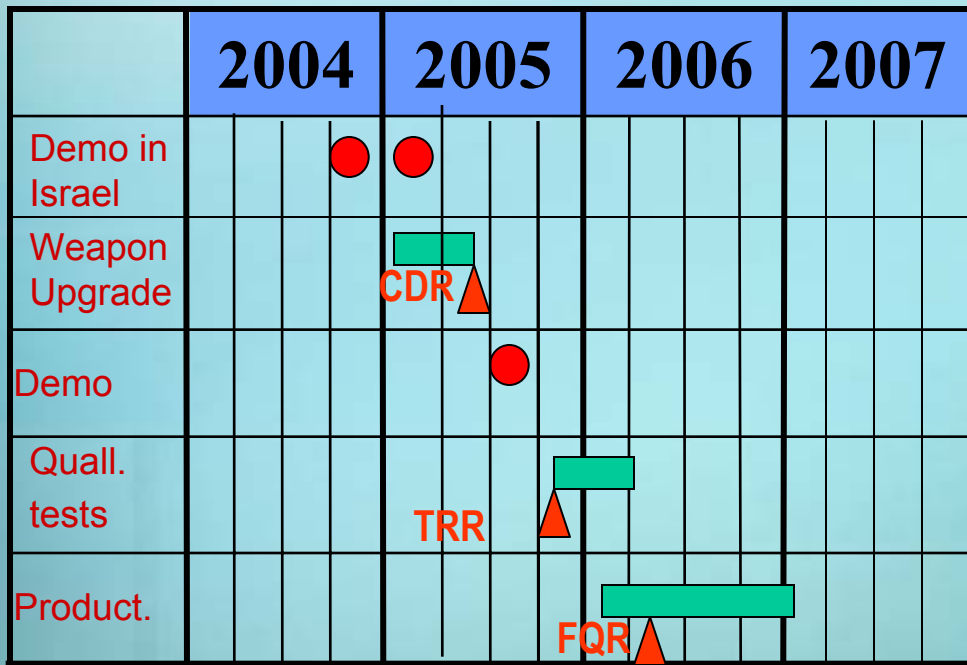

- ◆ Provides the warrior with common intelligence information up to 600m ahead and beyond concealed areas.
- ◆ Contains Integrated ICCD camera with transmitter.
- ◆ The information is transmitted backwards and displayed on the users hand held digital display with I.D on the digital map.

IMI is ready to cooperate with any company

Work plan:

◆ Demo phase:

- Base on past demonstration
- Upgrade the local assault rifle
- Full demo in customer's country

◆ Finish of FSD phase:

- Conclude at Quall tests at the end of 2005
- In parallel, integration of the MPRS as part of the C4I

MPRS was tested by the IDF during the Urban Battalion Training in March 2005.

The demo/tests included all MPRS capabilities.
